

Portable Flag Assembly Instructions

Step 1

Check you have everything in the Kit. Use the check list at the bottom

Step 2

Take your poles out of the bag and insert all of the poles together.

Step 3

Take the printed flag out of the bag and feed the bungee toggle cord through they eyelet.

Step 4

Now slide the flag pole up the black sleeve making sure the flag is pulled nice and tight.

Step 5

Hook the bungee cord on the bracket at the bottom of the flag pole.

Step 6

Attach your flag to your choice of support base. A spike base is shown in this example.

IMPORTANT

Never use your flag without an appropriate support base. Always assess the prevailing weather conditions before deciding to use your flag outdoors. Flags are designed for max wind speeds of 18MPH
